

SMART AND SIMPLE MEDICAL e-DEVICES FOR PREPARATION AND INJECTION

How to deliver simply, automatically and safely biologicals?

Complex biological molecules require appropriate medical devices for drug preparation and/or delivery.

Biologics

Viscous

Lyo
Multi-therapies

Suspensions
Emulsions

Time consuming

for the patient and
healthcare professional

Imprecise

not accurate dosage

Multiple forms

lyo, viscous, suspensions,
emulsions, multitherapies,
radiopharmaceuticals...

Unstable

very short lifetime requiring
preparation just before the drug
is taken

Complex

heterogeneous mixing,
dosing errors, user
dependent

Expensive

need to minimize product loss

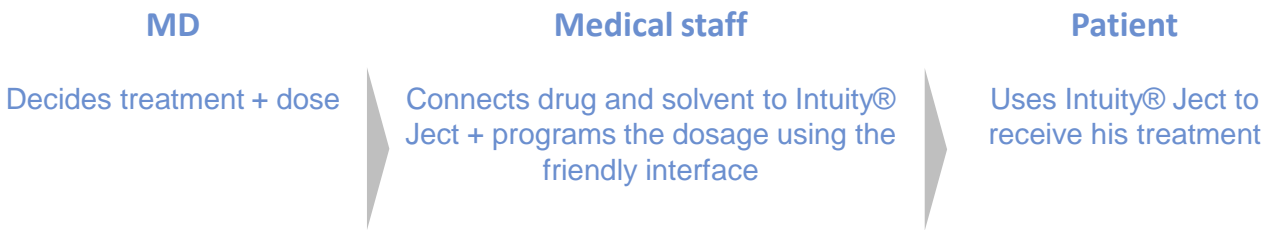

Our solutions offer an
**easy-to-use and patient
compliant medical e-device**
for complex therapies.

Intuity® Ject is our solution for easy preparation

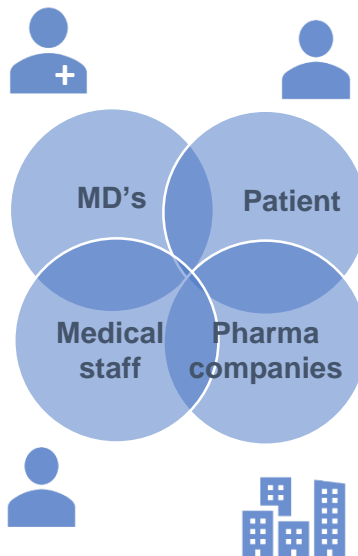

- Reusable device:
- Disposable cassette adapted to all standard primary containers – 1 cassette = 1 treatment
Adapted to mono & multi vials for SC or IM injection
- Connected & smart e-device
Data tracking, data sharing via GSM, drug recognition

How it would work?

Value proposition

- Personalized treatment
- Full dosage control
- Traceability

- Personalized treatment
- Time saving
- Up to 3 times less steps

- Easy-to-use
- Reduced errors
- Time saving
- Fully automatic
- Safe : No contact with potentially toxic products
- Less product loss

- Faster time-to-market
- Development tool
- Competitive advantage
- Simpler logistics

 <p>2009 incorporation</p>	 <p>100% focused on medical devices design, development and manufacturing</p>	 <p>HQ in France (Grenoble) Office in US (Boston)</p>	 <p>~30 Employees 50% dedicated to R&D</p>
 <p>Recognized partners</p>   <p>Oranomed PMB ALCEN</p>	 <p>Intuity® technology platform</p> <p>13 patent families</p>	 <p>Strong internal skills Microfluidics, Software, Electronics, Mechanics, Automation, Industrialization</p>	 <p>Strong Quality Management ISO 13485 IEC 62304</p>
