

SMART AND SIMPLE MEDICAL e-DEVICES FOR PREPARATION

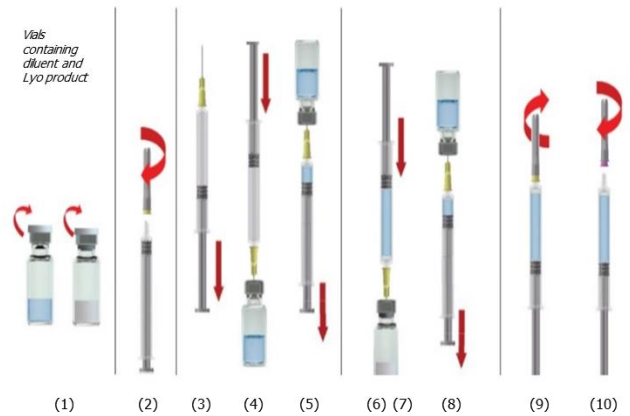

How to prepare new drugs simply, automatically and safely?

New drugs (lyo, viscous products, suspensions, radiopharmaceuticals, emulsions, cells...) are challenging both for patients and healthcare professionals.

Preparation can be complex due to number of ingredients and steps for the patient and the health professionals.

(Illustration of a complex drug's preparation ~10 steps)

Time consuming
for the patient and
healthcare professional

Imprecise
not accurate dosage

Complex
heterogeneous mixing,
dosing errors, user dependent

Not safe
contamination, sharps injury

Loss of product
resilient injection

Our solutions offer a
**convenient and
easy-to-use solution**
for homecare and
professional care.

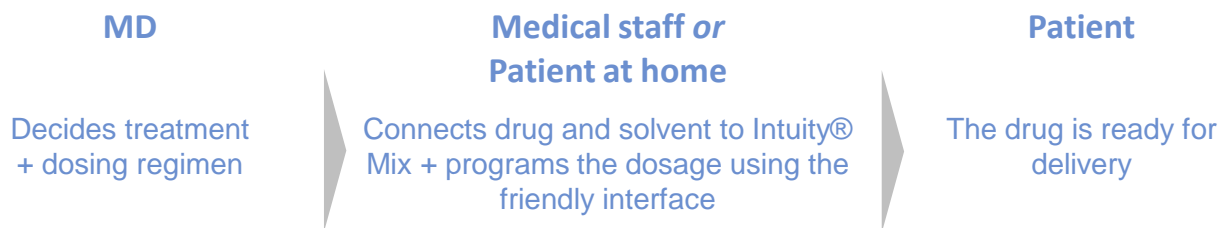

Intuity® Mix is our solution for a concurrent administration

- **Reusable device:**
- **Disposable cassette adapted to all standard primary containers – 1 cassette = 1 treatment**
Adapted to multi vials for SC or IM injection
- **Connected & smart e-device**
Data tracking, data sharing via GSM, drug recognition

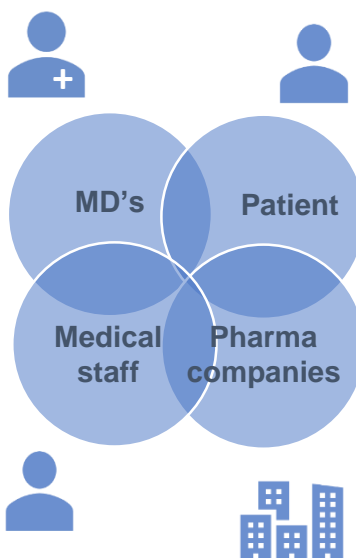

How it would work?

Value proposition

- Personalized treatment
- Full dosage control
- Traceability

- Personalized treatment
- Time saving
- Easy-to-use
- Minimum handling

- Simple to use and reduced errors
- Time saving
- Fully automatic
- Safe : No contact with potentially toxic products
- Less product loss

- Faster time-to-market
- Development tool
- Competitive advantage
- Simple logistics

 2009 incorporation	 100% focused on medical devices design, development and manufacturing	 HQ in France (Grenoble) Office in US (Boston)	 ~30 Employees 50% dedicated to R&D
 Recognized partners    oranomed  PMB <small>RLCCN</small>	 Intuity® technology platform 13 patent families	 Strong internal skills Microfluidics, Software, Electronics, Mechanics, Automation, Industrialization	 Strong Quality Management ISO 13485 IEC 62304
