

Transforming Patient Experience

SMART AND SIMPLE DEVICES FOR THE PREPARATION AND DELIVERY OF SUSPENSIONS AND DEPOT FORMULATIONS

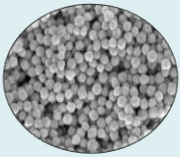

How to secure the preparation and delivery of suspensions?

The field of suspension and depot formulation is thriving but is challenging both for patients and healthcare professionals.

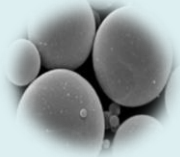

A complex market with a wide range of specific products

From small to large size

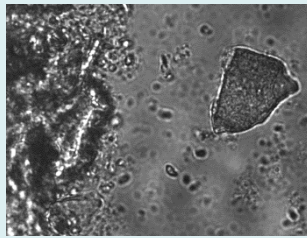

nm

>100µm

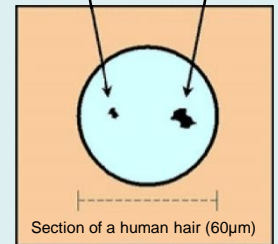

Agglomerate or dispersed

Spherical or not

2,5µm 10µm

Sedimentation

Heterogeneous mixing
Dosing errors
Resuspension prior to injection

Needle clogging

Partial dose delivery risks
Large needle size painful

Loss of product

Sticky products
Foamy products
Overfill costs

Safety

Contamination
Sharps injury

Our **customized solutions** offer **reliable, cost-effective and easy-to-use solution** for homecare and professional care.

Intuity® platform is the market facilitator for suspensions.

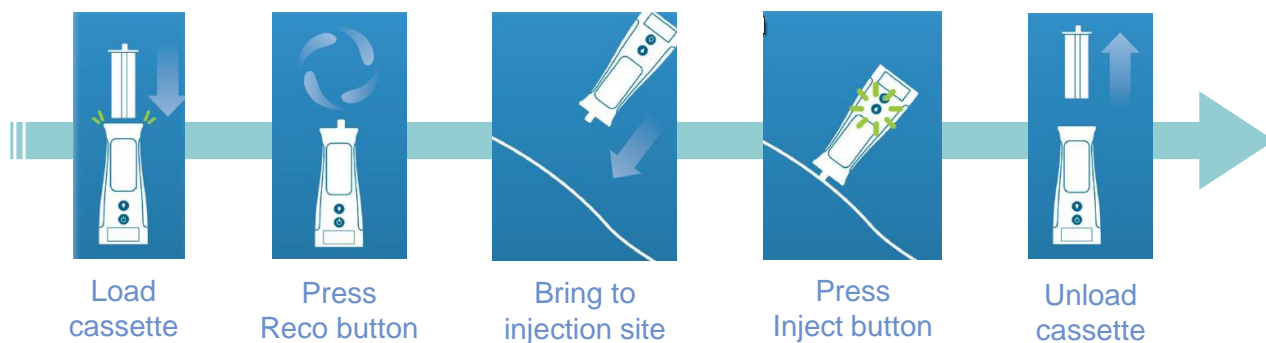

- Reusable part

- Disposable cassette adapted to standard primary containers – 1 cassette = 1 treatment
Adapted to multi vials + IV injection

- Connected & smart e-device
Data tracking, data sharing via GSM, drug recognition

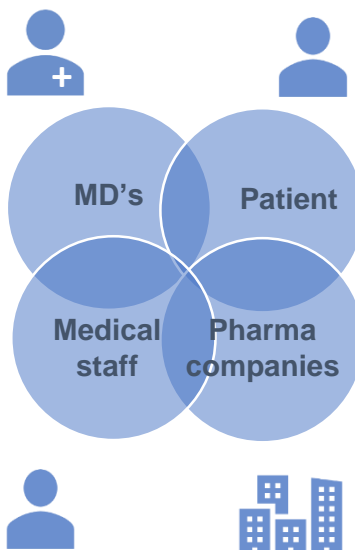

How would it work?

Value proposition

- Personalized treatment
- Repeatable results
- Traceability

- User-independent process
- Time saving
- Easy-to-use
- Minimum handling

- Simple to use and reduced errors
- Time saving
- Fully automatic
- Reduced foaming

- Faster time-to-market and time-to-clinic
- Development tool
- Competitive advantage
- Simple logistics
- Overfill cost reduction

 2009 incorporation	 100% focused on medical devices design, development and manufacturing	 France Headquarter	 ~30 Employees 50% dedicated to R&D
 Recognized partners    	 Intuity® technology platforms >15 patent families	 Strong internal skills Microfluidics, Software, Electronics, Mechanics, Automation, Industrialization	 Strong Quality Management ISO 13485:2016 IEC 62304
