

# JBT

FURTHER BY SHARING SKILLS

# HUB UP

**LET'S DEVELOP  
TOGETHER YOUR FUTURE  
MEDICAL DEVICE**

[WWW.JBT-HUBUP.COM](http://WWW.JBT-HUBUP.COM)

## WHY CHOOSING JBT HUB UP ?

We noticed that 75% of costs and solutions are frozen after less than 5% of expenses but without getting the advice of future stakeholders. Projects are then running out of control on costs and timing. **It's even more critical for complex or combined medical devices.**

## ... FOR A BETTER EFFICIENCY IN YOUR PROJECTS

JBT HUB UP is a **unique solution** gathering all operational skills to supply a **global solution** (design, execution, assembly, qualification, regulatory, ...) at the beginning of the project.

## OUR DNA

From the **idea of a medical device until the product is on the market**, JBT HUB UP alliance makes your project alive and drives it in **full confidentiality**.

JBT HUB UP : These recognized **industrial partners** in their respective fields are gathering entrepreneurial leaders, fully focused on solutions and means for the success of the customers requirements.

### **CONNECTING**

An alliance of industrial partners

### **SHARING**

A collective understanding grouping experience, knowhow and skills

### **BOOSTING**

A global offer providing both the agility of a small company and the power of an international group

## OUR PARTNERS

Benefit from our 30 years of experience in the Pharma and Medical industry. Leaders on their markets, our partners companies cooperate to supply you with a **competitive and innovative** solution.

**“BUILD AND BUILD UP TOGETHER”**

## OUR POOL OF SKILLS

Innovation, technological surveillance  
 Concept design, parts and product design  
 Project Management  
 Fluidic and mechanical technologies  
 Connected device, e-plastic, ...  
 Pilot and prototype molds  
 Design and construction of high volume molds  
 Plastic injection

- ▶ **INVESTMENT CAPACITY**
- ▶ **ISO 13485/15379 CERTIFICATIONS**
- ▶ **WORLDWIDE PRESENCE**

LSR, silicone injection/extrusion  
 Design and construction of prototype and pilot assembly benches  
 Design and construction of assembly machines, robotized systems, vision and controls  
 Qualifications, validations DQ, FAT, SAT, IQ, OQ, PQ  
 ISO7 & ISO8 clean rooms  
 Pharmaceutical plant  
 Assembly, printing and marking  
 Product and process validation  
 CE marking, regulatory  
 Service, machines and filing maintenance

## OUR VISION

SUPPLY MULTI-SKILLS

DE-COMPLEXIFY THE REQUEST

IMPROVE QUALITY

REDUCE & RESPECT TIMING

DECREASE RISKS & OPTIMIZE COSTS

KEEP PROJECT CONFIDENTIALITY

## OUR MEANS

Strong technical teams of more than 80 engineers and technicians and over 20 project managers.

A network supported by a powerful technology surveillance and an academic network in physical, biotechnology or fluidic characterization.

A team of quality and regulatory experts to guide your approach.

We guarantee a unique representative but you can contract either directly with one or more partners or with our common subsidiary.

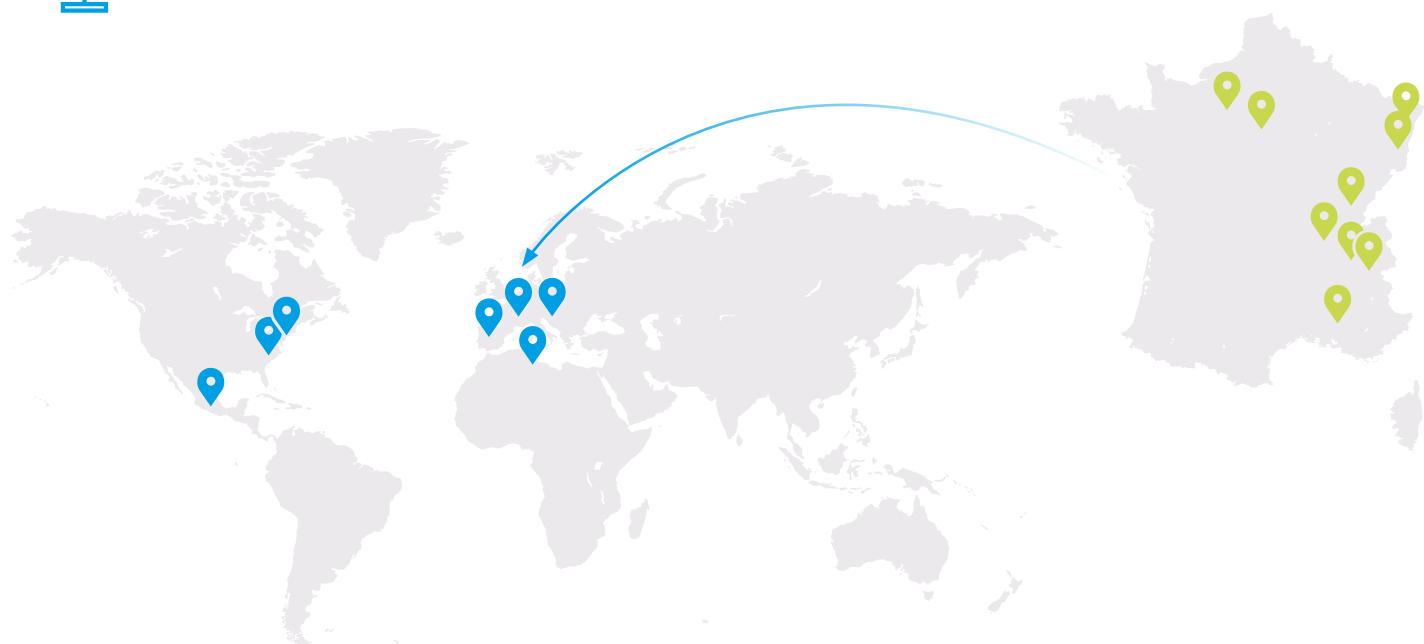

From the beginning, we create a common project team with a project leader as the customer's main contact.

Once the project is delivered, we guarantee a service in production, maintenance and regulatory support.
